

MicroSurvey CAD 2022 Released

December 22, 2021 | [Press Release](#)

MicroSurvey Software Inc. is pleased to announce the release of MicroSurvey CAD 2022. Drafting productivity is central to your success; MicroSurvey CAD is designed with your needs in mind. With integrated support for AutoCAD® 2018-2022 .dwg files, Revit and IFC BIM models, Artisan Rendering, and including a full suite of professional-grade survey tools, MicroSurvey CAD is trusted by land surveyors and civil engineers worldwide.

(West Kelowna, BC, Canada – December 22, 2021) – MicroSurvey announces the release of MicroSurvey CAD 2022. MicroSurvey CAD is powered by the latest IntelliCAD® 10.1 engine, providing users with workflow-oriented drafting and calculation workflows for land surveyors, including COGO, point tools for gridline-based projects, traverse input and adjustment, misclosure reporting, common data collector support, 3D surface representation and computation, corridor design, point cloud management, and more.

MicroSurvey CAD is perpetually licensed and is powered by IntelliCAD® which is compatible with AutoCAD® drawing files. With five available feature levels – Basic, Standard, Premium, Ultimate and Studio – MicroSurvey CAD gives users the choice between several tiers of features to ensure they are getting precisely the tools and price point they need.

Notable improvements in MicroSurvey CAD 2022 include:

- **IntelliCAD 10.1** which includes full support for AutoCAD® 2018-2022 .dwg files, performance enhancements, table objects, array objects, streaming background imagery, 3Dconnexion device support, a new CLONE command, sheet sets, dynamic block support, and much more;
- **Floating License Checkout Protocols** have been added, allowing users to work offline for up to 4 days without a USB key.

Full details are available in the [MicroSurvey CAD 2022 Release Notes](#).

MicroSurvey offers free 30 day trial versions for all of its major software – [Click Here](#) to download your trial version of MicroSurvey CAD today!

ABOUT MICROSURVEY

MicroSurvey, part of Hexagon, is a world leader in software development, providing market specific solutions and services for surveyors, engineers, public safety and mapping professionals.

Specializing in the development of industry specific solutions since 1985, MicroSurvey produces mobile software for use with total stations and GPS, as well as a full complement of desktop solutions to increase efficiency and productivity in the office.

From single user applications to country wide government implementations, MicroSurvey solutions are used around the globe for Land Surveying, Engineering, Mapping, Law Enforcement, Forensic and Accident Reconstruction.
